About Us

Brighter Lines has been operating throughout Australia specializing in its unique playground art range for schools and play areas for many years. It has been described as a very innovative way to deliver a new way for educating our young people while they are busy at play. Brighter Lines playground markings are a licensed and copyrighted product with proven success for behavioral changes within school grounds.

By using many years of experience and animating some of our old favorite playground markings like hopscotch and adding very bright and vibrant colors, children are drawn to want to play on these fantastic games and learn to count and spell at the same time. What a great outcome. As well as having a unique playground hopscotch, most of the featured games come with their very own copyrighted teachers guide to encourage outdoor learning to help break the boredom of a classroom environment.

Scientific research indicates to us that by using bright colors and bold lines it makes your play area more inviting and helps keep the children more engaged with active play within the playground. With Brighter Lines range of education playground markings and over 50 signature games it will add color and animation for your hard surface/court areas plus we have the knowledge and experience to re-mark all your existing court markings. Line marking is often forgotten about but is usually the most inexpensive way to keep your school looking great, vibrant and inviting for fun.

Below is a summary of the main games we have on offer. We can also design a game to suit a particular need.

All games ordered will include a complementary teacher's aide that will be given to you on completion of the work.

Please allow an approx. 3m x 3m area per game taking into consideration for line-up and playing of the games.

Literacy Designs

Rainbow Snake © \$
Approx 11m

SOME IMPORTANT INFORMATION

HOURS OF OPERATION & ACCESS

Brighter Lines trades MONDAY TO FRIDAY during the school term, 6am – 6pm (8:30pm summer time).

A school delegate will arrange site access (e.g. gate ways), else if a delegate is not available then the appropriate keys will be collected by Brighter Lines for the duration of the works to be completed.

Toilet Facilities – Access will need to be made available to appropriate toilet facilities for the duration of the works.

Vehicle Access – Easy access to the site for work vehicles, plant & equipment will need to be made available, else a surcharge may apply. Barriers to access include (but are not limited to): stairs/gradient tiered slopes, insufficient driveway/internal road access, “off road” pathways including dirt tracks and sand.

DESIGNS & COPYRIGHT

Designs may vary from school to school and colors may vary depending on which paint is chosen.

All dimensions shown are approximate and are to be used as a guide only.

Please note: the designs marked “©” are the sole properties of BRIGHTERLINES and are covered by relevant STATE and FEDERAL I.P. Industrial and COPYRIGHT 2019 laws.

SITE CONDITIONS

All surfaces to be line marked are to be dry and free of any dirt, debris, defects, building materials, vehicles and contractors.

WET CONDITIONS – Works cannot be completed under the following circumstances: rainfall, dewy surfaces & recent pressure washing. Minimum drying time will vary depending on the sites access.

COLD TEMPERATURES – Our products require a minimum surface temperature of 10°C to be applied in order for appropriate adhesion.

Brighter Lines will endeavor to complete works in a timely manner, however weather may delay completion from time to time.

SAFETY & SURFACES

We will endeavor to position our games and use appropriate products with safety in mind. We will be looking for anything that may affect the safety of the children when playing these games when positioning the artworks around the school.

We use a non-slip additive in our paint product, however any painted surface, no matter what paint is used, can be slippery when wet, and all care should be taken when a surface is wet.

Schools electing to get any painted product – on their school playground must accept ownership and responsibility for having such artwork within the school.

Brighter Lines goal is to endeavor to produce the highest standard of work possible at your school, using proven, top quality products and knowledge. However Brighter Lines stresses that we are only as good as the ground that we paint on. Every surface has a different makeup and all schools environmental conditions and traffic conditions are also different.

Please refer to our playground site inspection form for more information about appropriate surfaces, factors affecting game longevity and detailed safety issues to be considered.

GUARANTEE

Surfaces and conditions at each school are different, and because of the nature of the games and the treatment they attract, it is hard to predict longevity of the artwork. Games and designs are expected to scuff and/or fade to some degree over time, especially if exposed to UV light. However, if a game is unplayable within one year, we will come back and repaint that game for free. This guarantee is NOT VALID for those areas we have stated as high risk in the site inspection or games that have been re-painted by a third party with any other product we have not supplied or recommended. Re-painting games under this warranty period will take place at Brighter Lines convenience and when we are in your immediate area.
